a
Agreement with the human response
r
Chimpanzee 0.676
Macaque 0.534
Baboon 0.507
Cow 0.345
Rabbit 0.334
Sheep 0.278
Pig 0.265
Mouse 0.228
Rat 0.206
0.0 0.2 0.4 0.6
Mean Pearson correlation
Points and 95% subject-jackknife intervals
b
Six non-primate donors
Correlation with human
0.2 0.4 0.6
1 2 3 4 5 6
Number of donor species
Best subset
Mean subset
Worst subset
c
All nine donors
Correlation with human
0.2 0.4 0.6
1 2 3 4 5 6 7 8 9
Number of donor species
Shading: the range across all subsets of each size
d
Redundancy limits the expected gain
Measured range
Model extrapolation
Chimpanzee 0.676
Asymptote 0.536
Macaque 0.534
297*
R(k) = kr̄ / √(k + k(k − 1)ρ̄)
r̄ = 0.276, ρ̄ = 0.265
Correlation with human
0.2 0.4 0.6
1 6 20 100 400
Number of species (log scale)
*Model crossing; no 297-species panel was measured
